

# Tower Transfer

▶▶ Your challenge is to move the entire stack of 7 disks to another peg, obeying the following rules:

- Only one disk may be moved at a time.
- Each move consists of taking the upper disk from one of the pegs and sliding it onto another peg, on top of the other disks that may already be present on that peg.
- No disk may be placed on top of a smaller disk.
- A disk must always be placed on a peg (it may not be set aside temporarily).
